

Description: Xinelam LED Light Sources KIT, using a unique design, Completely in accord with the connotation of green lighting, contains highly efficient energy-saving, environmental protection, safety, comfort, long-life. Specifically optimized design for solve the problem of Invisible or Imperceptible Flicker, Protect your eyes - No flicker!

Waterproof

IP67

CRI >85

Luminous efficiency

110Lm/W AC input

Sizes

A variety of options

No flicker

No Visible Flicker

No Imperceptible Flicker

Long-life LED panel

Long-life power supply

Full AL Board radiator

No additional heat sink

Application specs	
Brightness	A variety of options
Default Colors	CW6000~6500K
Other colors	WW2700~3200K NW4200~4700K
CRI	> 85
Application Environment	Dry & Damp Locations
Operating Temperature	-22°F~122°F (-30~50°C)
Electrical specs	
Power	A variety of options
Input	AC 90~265V
Warranty	3 years
Certification	CE RoHS FCC

VS

How to identify Invisible or Imperceptible Flicker:

The easiest way is: take out your camera or mobile phone with a camera function, close-up shots lamp light source, less than 30cm (high brightness point light source is required to use the lampshade diffusion cover), flicker the lamps will show blinds or appear regularly stripes; the no flicker lamps like a blank sheet of paper, not streaks.

The Invisible or Imperceptible flicker, can also affect human health, such as: The effects can range from headache to the decreased visual performance to non-specific malaise to the onset of some forms of epilepsy. [IEEE P1789](http://www.ieee.org/publications_standards/publications_standards_content.do?doi=10.1109/17.147189)

RX-AFL28 series specs

MODEL	LED panel		LED drivers		Attachment		Luminous flux	Total Power	Comment
	Diameter Thick 3mm	Input	Model	power Input	M4 screws M4 stud 15mm Magnetic 9mm	Shrink tube			
RX-ALF28-N16 Round panel	Ø160mm 45LED	9Sx5P* 26~31V Max0.3A	EFC-09	AC90~265V PF>0.5	3set	2set	1200Lm	12W	Replace 21W 2D tube

*9sx5p: 9 series and 5 LEDs in parallel connection. Total power - Including drivers power consumption, Tolerance range for optical and electrical data: ±10 %.
 The above table data testing at room temperature is 25 °C, test voltage AC230V 50Hz; LED color temperature 6000-6500K, CRI: >85, long-life: ≥ 50000hours
 Protection: IP67; Beam spread: 120°; Temperature: -20 °C ~50 °C Storage Temperature -20 °C ~60 °C,
 Long-life power supply, 105°C long life electrolytic capacitors of 10000 hours, 10 times longer than ordinary life electrolytic capacitors

Dimensions

1. Waterproof round LED panel light-emitting uniform, Central point without dark areas

IP67 waterproof treatment
 full Aluminum substrate cooling module

VS

Low prices, poor cooling effect
 lamps center of the dark area.

2. The world famous iWatt digital power chip; Ensure that the products comply with safety regulations!
 TRIAC dimmer compatible, No flicker

EFC-15D Internal circuit boards
 Using Rubycon 105°C long life electrolytic capacitors of
 8000~10000 hours, 10 times longer than ordinary life
 electrolytic capacitors
 Meet "Safety and Regulations" requirements

VS

Ordinary electrolytic capacitor life is 800 ~ 1000 hours
 Not enough creepage distance, does not comply with safety
 regulations, the risk of electric shock
 Without EMI components, Not EMI and EMS test
 MLCC capacitor , low price, flicker

Installation:

1. Disconnect power to the fixture at source. **DO NOT SIMPLY SWITCH OFF FIXTURE.**
2. Ensure you are working with standard Fluorescent Light fixture.
3. Unpack the LED panel Light:
Unpack and carefully examine product
Do not use the product if it is damaged
4. Open the fixture housing. Cut wire and remove the ballast. Remove the starter if exists
Re-connect the Hot (L) wire to one end and Neutral (N) wire to the other end
5. Check to ensure wiring is done correctly then close the fixture housing
6. Affix warning labels to fixtures near socket so they are visible to tube light installers
7. Re-connect power to the fixture and turn on switch. The LED Tube Light will light

Note:

1. Cut off the power before installation to ensure the switch in the closed state, to prevent electric shock.
2. To avoid the installation of the heat source and hot steam, corrosive gas, so as not to affect the life span.
3. This product is limited to indoor use, outdoor water-proof, please note
4. Is not compatible with traditional dimming, can not use dimmers (Indicate TRIAC dimming except)
5. Mounting location before installation to ensure that products can withstand the weight. Avoid high-altitude drop, hard object collisions, percussion.

Warning Description:

Open the product should immediately check the product after packaging is intact. Appear artificial or statement within the specified requirements caused by the failure, retreat retailers or directly return to factory replacement. Such as long-term disabled should be stored in cool, dry, clean environment, prohibit the humid, hot, or flammable places of storage and use. Not disassemble, replace the device. Product improvements or other reasons due to parameter change without notice.
