

**Description:** RX-ALF3528 waterproof LED aluminum panel, Patent No.:ZL200820131053, ZL200820132702. With the top SMD3528 LED, unique waterproof design, the world's first, holds several patents, has a slim, low temperature rise, waterproof, safe, reliable, long life; strength over 60,000 hours aging test; Around the world, more than 7 years practical application, to good effect. Mainly used for light boxes backlight, large-scale projects, shopping malls, railway stations, airports and other high-end places lighting, a variety of power, in various sizes, you can also customize the size, the professional energy-saving lighting project.

1. Large-size waterproof LED module
2. No additional heat sink is required
3. Can customize size you need, maximum 0.9x0.9m
4. LED spacing options 16mm, 25mm, 33mm
5. Standard size 300x300mm, 300x600mm, 600x600mm
6. Patent number: ZL200820131053, ZL200820132702
7. lighting fixtures Light source, advanced advertising backlight
8. Input voltage DC12V (Optional: DC24V)
9. LED chip luminous efficiency: 150Lm / W
10. CE RoHS FCC

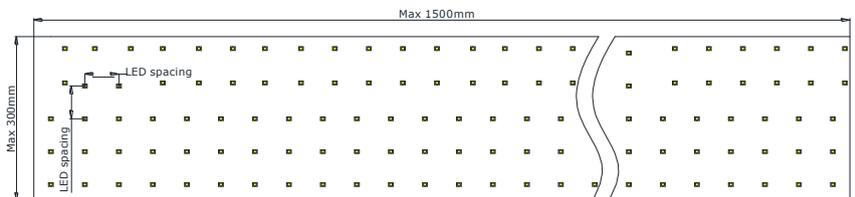

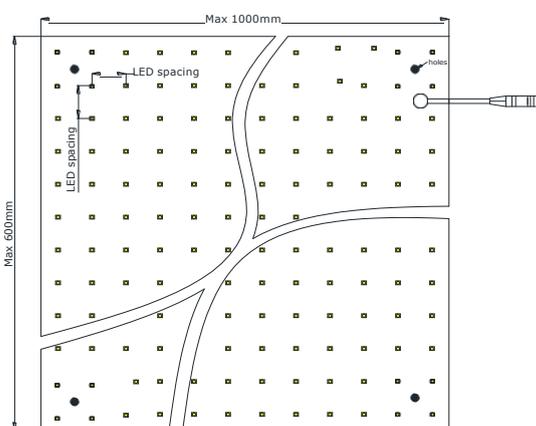

**Application specs**

Brightness	8Lm / LED
Default Colors	CW6000~6500K
Other colors	VW2700~3200K NW4200~4700K
CRI	> 80
Application Environment	Dry & Damp Locations
Operating Temperature	-22°F~122°F (-30~50°C)

**Electrical specs**

Power	0.08W / LED
Input	DC 12V
Warranty	3 years
Certification	CE RoHS FCC

**Schematic diagram**

LED side lead wires

back side lead wires

\*3LED a group, each row or column of the LED QTY is preferably a multiple of three.

Our can customize the size you need, the maximum area of 1m<sup>2</sup>; You need to shape, you need to power up to 200W.

Wiring diagram

Parallel connection (recommended)

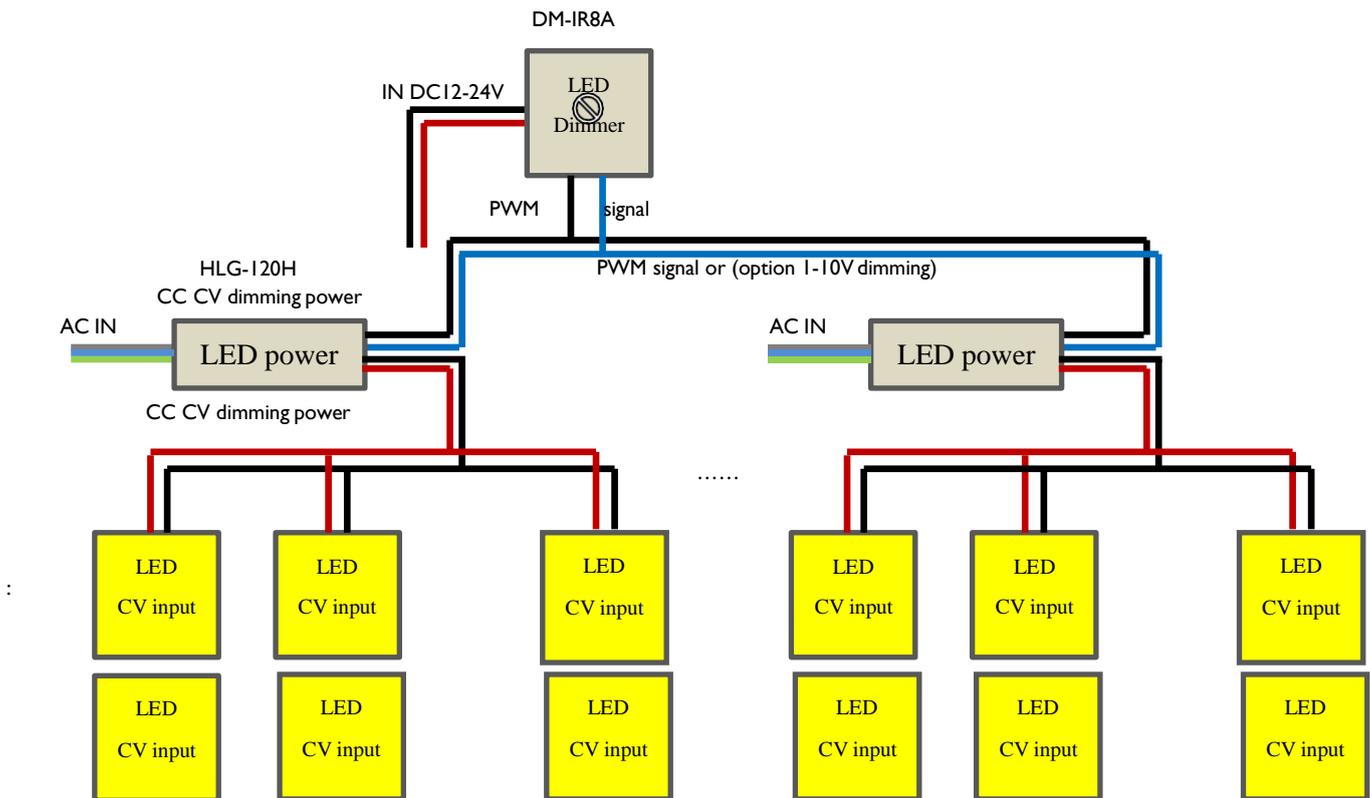

Series connection Max: 5A

Recommended Dimming system

Dimming power + PWM signal (Option I-10V)

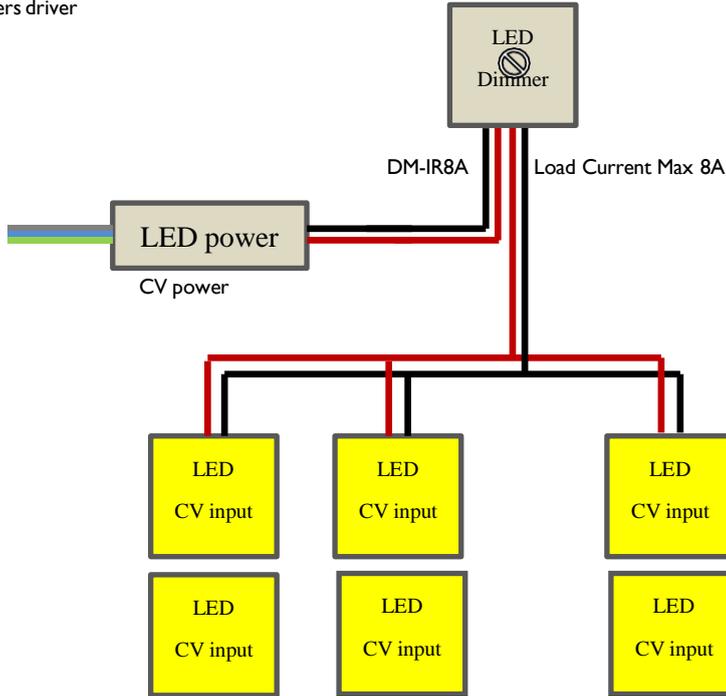

HLG-120H-\*\*B + DM-IR8A

A large area of simple synchronous dimming system - No PWM flicker  
 Constant voltage constant current power supply - 100% load power

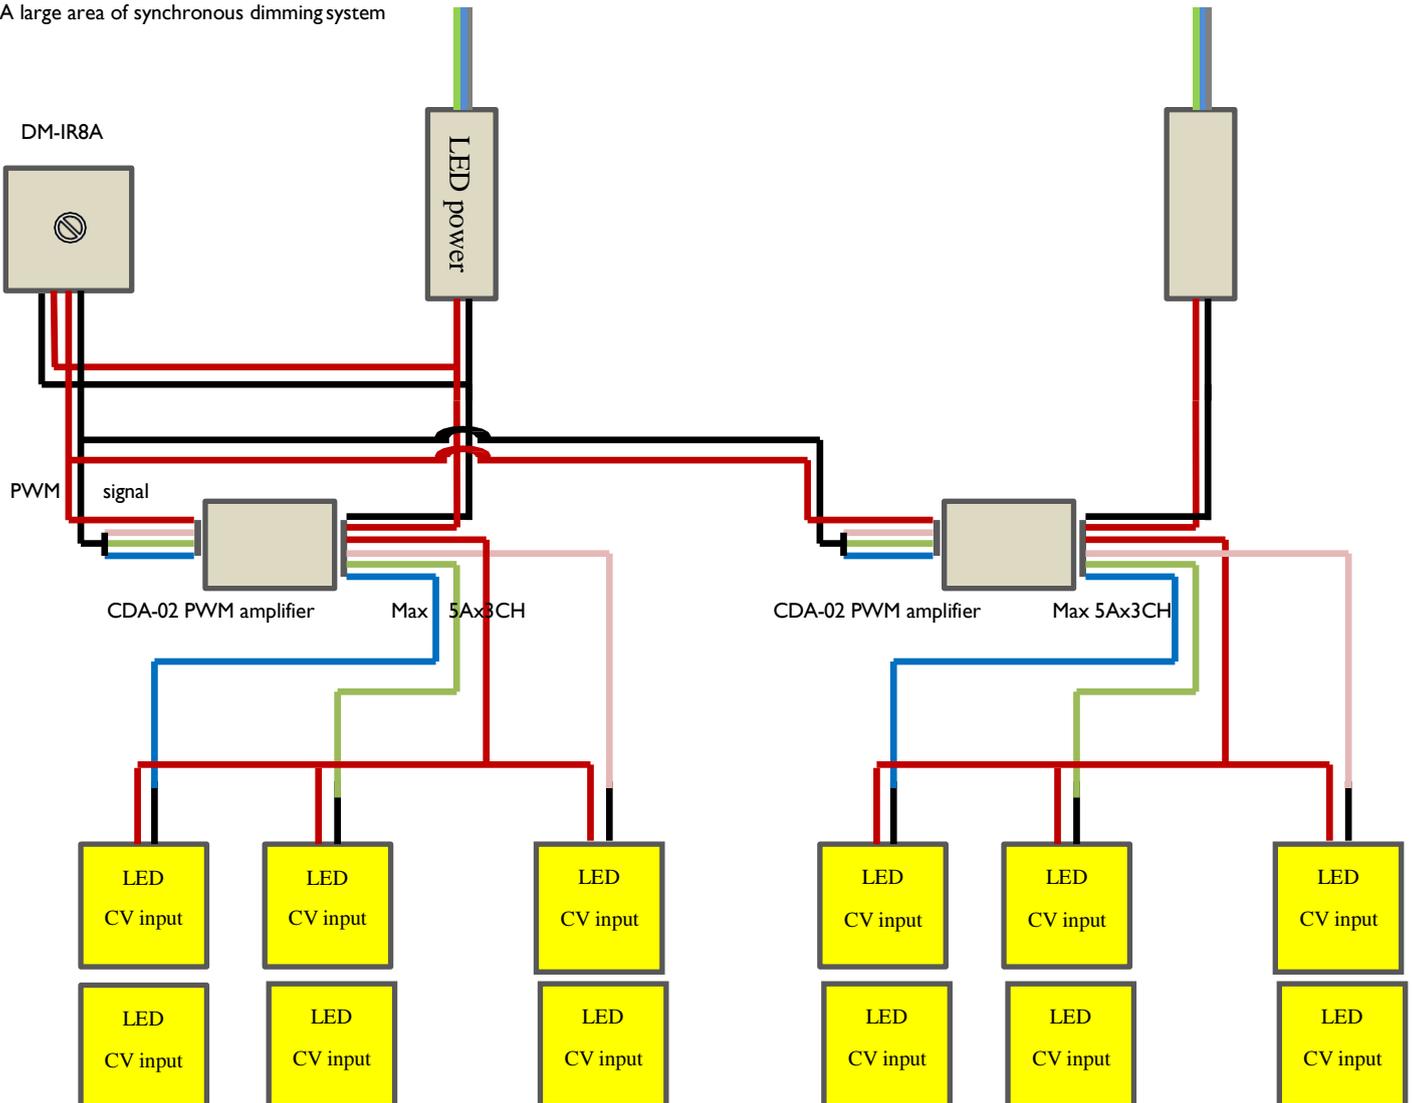

### Other Dimming system

CV power + PWM dimmers driver

Calculations are based on 85% max load on Constant voltage power supply

### A large area of synchronous dimming system

DM-IR8A PWM dimmers, including infra-red remote control.

**CAUTION: This product is installed by a professional engineering staff.**

## Safety Information

1. The LED panel itself and all its components may not be mechanically stressed.
2. Assembly must not damage or destroy conducting paths on the circuit board.
3. Installation of LED lamp (with power supplies) needs to be made with regard to all applicable electrical and safety standards. Only qualified personnel should be allowed to perform installations.
4. Correct electrical polarity needs to be observed. Wrong polarity may destroy the LED panel.
5. Parallel connection is highly recommended as safe electrical operation mode.
6. Serial connection is not recommended. Unbalanced voltage drop can cause hazardous overload and damage the LED panel.
7. Please ensure that the power supply of adapters power to operate the total load.
8. When mounting on metallic or otherwise conductive surfaces, there needs to be an electrical isolation points between strip and the mounting surface.
9. Pay attention to standard ESD precautions when installing the LED panel.
10. Damaged by corrosion will not be honored as a materials defect claim. It is the user's responsibility to provide suitable protection against corrosive agents such as moisture and condensation and other harmful elements.
11. Waterproof LED panel , please note waterproof wiring department
12. LED panel can't be used as support, you need fixed in the frame, fixed to the wall, otherwise, may cause deformation.
